1. INTRODUCTION

ITTF Parkinson’s World Table Tennis Championships is an event for players with Parkinson’s disease, where family members and the general public are proactively invited to assist. It is an eagerly anticipated and historic event that raises awareness of Parkinson’s disease and showcases the impact of table tennis on a social, mental and physical level thereby generating a better quality of life for them. It is considered a huge success as it demonstrates community at its best. It is an event with more focus on the participation and involvement of all participants, relatives and accompanying persons to show others an example of what table tennis can do to improve their health.

There were previous ITTF PWTTC held in 2019 and 2021, in both, there were different criteria to define the classification of the participants. Nevertheless, the classes were already defined, and the players participated, we didn’t find too many even matches in the competition, so the idea with the definition of these new criteria for the participants to be classified is to have the classes and the levels, the closest possible and to enjoy playing matches with people with similar conditions and matches that could be lost but also could be won.

3. DATA REQUIRED TO DEFINE THE CLASSIFICATION

Since we consider both the Parkinson’s Disease situation and the Table tennis level, we will need to get parameters related to both:
   a. Year of birth.
   b. Year of Parkinson’s disease onset.
   c. Parkinson’s disease stage.
   d. Table tennis skills level.

4. CRITERIA TO DEFINE THE CLASSIFICATION

a. Age of the participant.
b. Number of years with Parkinson’s disease.
c. Parkinson’s disease stage.
d. Table tennis skills level.
5. PARKINSON’S DISEASE STAGE

The Parkinson’s disease stage is based on the Hoehn and Yahr Scale which measures how Parkinson’s symptoms progress and the level of disability. It is separated into 5 different stages.

a. Stage I:
• Symptoms at this stage are mild and do not interfere with daily activities.
• Movement symptoms (such as tremors, rigidity, and bradykinesia) affect just one side of the body (unilateral).
• Mild problems with posture and balance, slight difficulty walking and mild changes in facial expressions.

b. Stage II:
• Symptoms at this stage become worse, making daily activities more difficult. The person is, however, able to look after themselves.
• Movement symptoms (such as tremors, rigidity, and bradykinesia) affect both sides of the body (bilateral).
• Difficulty walking, difficulty balancing, poor posture and reduced facial expressions.

c. Stage III:
• Symptoms at this stage are more severe than those of stage II. However, the person is still independent.
• Loss of balance and bradykinesia (slowness of movements) are the hallmark symptoms of this stage.
• Daily activities such as eating, bathing and dressing are significantly impaired.

d. Stage IV:
• Independent living is almost impossible at this stage due to limitations in daily activities such as eating, bathing, dressing, sleeping and walking.
• The person may be able to stand on their own but need assistance to move around.
• A walker may help in the movement without falling.

e. Stage V:
• Symptoms at this debilitating stage become so severe that even standing on one’s own may be impossible.
• The person becomes bedridden and needs a wheelchair to be moved around.
• All daily activities are impaired, requiring an around-the-clock caregiver.
• Symptoms may include delusions (false beliefs that do not change despite conflicting evidence), hallucinations (seeing, feeling or hearing things that are not there) and loss of smell.
6. TABLE TENNIS SKILLS LEVEL

The table tennis skills level has been created from a table that defines the participants from beginner to Advanced+ (6 categories), according to parameters defined from the serve, the forehand/backhand strokes, the footwork and the game knowledge/tactics.

The participant needs to check and see which colour below identifies more with their level.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>How are your serves?</td>
<td>I can do basic serve only from one side</td>
<td>I can do basic serve from both sides</td>
<td>I can do several different kinds of basic serves</td>
<td>I can do serves with spin or speed but cannot apply both at the same time</td>
<td>I can do advance serves, combining different variations of speed and spin</td>
<td>I can do very advanced and strategic serves with top, back and side spins and opponents have trouble returning them</td>
</tr>
<tr>
<td>Forehand/backhand</td>
<td>I can play only from one side</td>
<td>I can play from both sides</td>
<td>I can play from both sides with different speeds</td>
<td>I can play from both sides with different spins and speeds</td>
<td>I can play both sides with different spins and speeds</td>
<td>I can play both sides with different spins and speeds with consistency</td>
</tr>
<tr>
<td>How is your footwork?</td>
<td>I’m able to keep one position and can only play from it</td>
<td>I need to move but able to stop and play a shot</td>
<td>I can move in one direction only and difficult return</td>
<td>I can move in both directions and move and play when needed</td>
<td>I can move both sides and forwards/backwards with different speeds</td>
<td>I can move both sides and forwards/backwards with different speeds anticipating my opponent’s positions and movements</td>
</tr>
<tr>
<td>Game knowledge/tactics</td>
<td>I know that two players play and the one loosing the shot loses the point</td>
<td>I know basic rules</td>
<td>I know the rules and able to see how the opponent plays</td>
<td>I know the rules and I’m able to read the opponent actions and movements but not using my movements and shots against them</td>
<td>I can read the opponent’s game and use my strokes accordingly against them or using mines to get reaction from opponent without consistency</td>
<td>I can read the opponent’s game and use my strokes accordingly against them or using mines to get reaction from opponent with consistency</td>
</tr>
</tbody>
</table>

1. Beginner
2. Beginner⁺
3. Intermediate
4. Intermediate⁺
5. Advance
6. Advance⁺
7. LEVELS IN THE CLASSIFICATION

a. Class I: the one with more options of movement and less advance in Parkinson´s Disease, plus more table tennis skills.

b. Class II: the one with a middle range of movements, Parkinson´s Disease and table tennis skills.

c. Class III: the one with more limited movements and more advance in Parkinson´s Disease, with less table tennis skills.

8. WEIGHT OF EACH OF THE CRITERIA TO GET THE FINAL CLASSIFICATION OF THE PARTICIPANTS

a. Age of the participant:
   i. Participant age $\leq 50$ years 10 points.
   ii. 50 < participant age $\leq 55$ years 08 points.
   iii. 55 < participant age $\leq 60$ years 06 points.
   iv. 60 < participant age $\leq 65$ years 04 points.
   v. Participant age $> 65$ years 02 points.

b. Number of years with Parkinson´s disease:
   i. Years PD $\leq 04$ years 10 points.
   ii. 04 < years PD $\leq 08$ years 08 points.
   iii. 08 < years PD $\leq 12$ years 06 points.
   iv. 12 < years PD $\leq 16$ years 04 points.
   v. Years PD $\geq 17$ years 02 points.

c. Parkinson´s disease stage
   (please, go to paragraph 5 to know the stage):
   i. Stage I 40 points.
   ii. Stage II 30 points.
   iii. Stage III 20 points.
   iv. Stage IV 10 points.
   v. Stage V 00 points.

d. Table tennis skills level
   (please, go to paragraph 6 to know the skills level):
   i. Advanced+ 40 points.
   ii. Advance 32 points.
   iii. Intermediate+ 24 points.
   iv. Intermediate 16 points.
   v. Beginner+ 08 points.
   vi. Beginner 00 points.
9. OTHERS

The participant could be asked if they want to play in a higher category.
